### Skills

- [CompTIA Security+](#)

- Solidity, Ethers.js, DeFi, Chainlink, Chai, Graph, Ceramic

- Git, Github, Vercel

- Auditing & Report Writing

- Team spirited go-getter with a never say never attitude.

- Presentation and Event organization (virtual and physical)

---

---

### Experience

**Blockchain Club, University of Benin / Co-Founder, [Director of Partnerships](#)**

I co-founded the blockchain community at my University where we seek to bring blockchain technology and its applications to the limelight.

Now, I handle communications and relationships with external organizations, brokering mutually-benefitting partnerships.

#### **ETHGlobal - HackMoney**

I participated in this conference (proof [here](#)).

On my team, I handled the Chainlink VRFs especially to make API function calls and introduce real-world data.

When issues came up, I managed external liaisons with BlockFarms (the protocol that provided the APIs) and rigged together custom APIs for the project.

#### **Auditing**

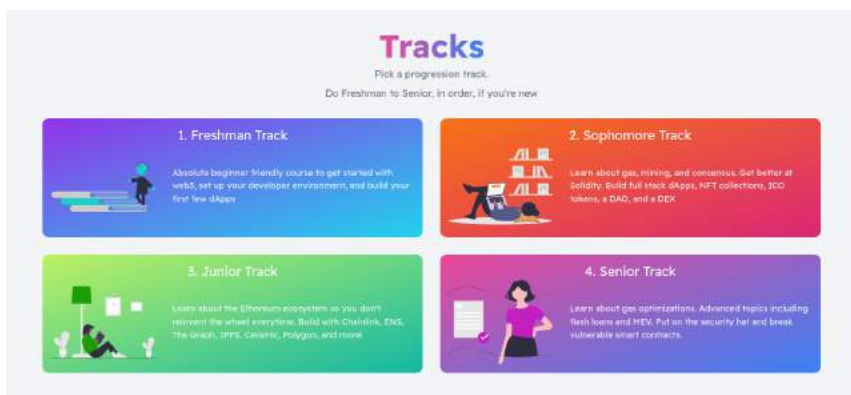

I performed a comprehensive audit on contracts for QuillAudits. Discovered and wrote exploit code for critical-level vulnerabilities found in the **assembly** section of the contracts in the scope. [Link to the audit report](#).

## Dapp Development

With LearnWeb3DAO, I effectively built and contributed to their open-source community. I worked on projects ranging from basic token creation in the Freshman track to coding an MEV bot in the Senior Track.

Here, I used the following technologies: Chainlink, ENS, The Graph, IPFS, Ceramic, Flashloans.

Links to all works are on my Github and hosted on Vercel as well.

---

## Education

---

### Cryptozombies - [www.cryptozombies.io](http://www.cryptozombies.io)

I completed the learning tasks here and got my first dose of the Web3 space.

### Secureum

### Ethernaut, DamnVulnerableDefi

I learned to exploit smart contracts and their possible vulnerabilities, and to interface with contracts externally and via the console. Delegatecall, Reentrancy, and many other exploit formats.

### University of Benin, Edo State

B.Eng Computer Engineering

I am widely read, especially in the areas of finance. A personal hobby of mine is market forecasting and directional analysis utilizing financial tools and services. I had a personal [blog](#) on it for two years.

---

## Awards

---

### [CompTIA Security+](#)

 This badge was issued to [Anuoluwapo Adebayo Adeleke](#) on January 15, 2022  
Expires on January 15, 2025 [Verify](#)

[Additional Details](#)

#### CompTIA Security+ ce Certification

Issued by [CompTIA](#)

Earners of the CompTIA Security+ certification have the knowledge and skills necessary to perform core security functions required of any cybersecurity role. CompTIA Security+ professionals know how to identify and address potential threats, attacks and vulnerabilities and they have established techniques in risk management, risk mitigation, threat management and intrusion detection.

#### Skills

Access Control	CompTIA	Cryptography	Cyber Forensics	Data Security
Disaster Recovery Planning	Firewall Configuration	Malware Identification	Mobile Device Security	
Network Security	Security Configuration	Security Policies	Threat Analysis	Threat Detection
